

Hazardous Chemical Categories: Flammable Solids

Flammable solids are hazardous

because they... ◆ ignite easily.
◆ burn vigorously.

Some flammable solids...

- ◆ may ignite from friction or heat.
- ◆ may ignite on exposure to air.
- ◆ ignite in the presence of water.
- ◆ ignite spontaneously.

Always...

- ◆ Read MSDS and warning label instructions when working with flammable solids.
- ◆ Use and store flammable solids in temperature-controlled environments.
- ◆ Keep containers closed.
- ◆ Avoid heat, sparks and flames.
- ◆ Prohibit smoking around flammable solids.
- ◆ Ground and bond containers during transfer.
